Jackson, WI

WELL CONSTRUCTION SEMINAR

Over 90% of Wisconsin's municipal water utilities use groundwater as their source. These communities from time to time require the construction of new wells. The well construction process can be complex and confusing. This seminar will address this process and give attendees an understanding of what to expect and what it takes to construct a new well for a municipal water utility.

- I. Beginning the Process
- II. Working with Contractors
- III. Preliminary Approvals
- IV. New Well Location
 - a. Setbacks
 - b. Geology
- V. Well Site Assessments
- VI. Well Construction
 - a. Choosing the right design
 - b. Drilling Methods
 - c. Well Development
- VII. Wellhead Protection
- VIII. Going Online
- IX. Troubleshooting

PROGRAM GOAL

To provide an understanding of the process of constructing a new municipal well.

SPEAKERS

◦Short Elliot Hendrickson

Kelly Zylstra, PE

◦Municipal Well and Pump

Marty Van Ells

**The room will open at 7:30 am
