Green Bay, WI

June 22, 2011

Woodville Lion's Den
131 South Main
Woodville, WI

June 28, 2011

Village of Jackson
N168 W20733 Main St.
Jackson, WI

WATER AND ENERGY

There is a significant connection between providing water to customers and energy usage. For most utilities in Wisconsin, energy costs are the largest budget item. Understanding the relationship to water and energy is essential to solving issues and reducing energy costs within a water utility operation. This class will provide an overview of that connection and provide strategies that utilities can employ to reduce energy costs, reduce water loss and save money. Case studies will be used to illustrate the conservation, renewable energy options and system optimization. Finally, we will discuss how utility managers and water professionals can creatively finance system improvements and build a strong business case for investment during lean economic times.

- I. Water and Energy Overview
- II. Energy Efficiency/Conservation Technologies
- III. System Optimization/Operations
- IV. Renewable Energy
- V. Funding/Strategy

PROGRAM GOAL

The goal of this class is to provide attendees with the knowledge to make sound decisions and improvements to reduce energy costs and improve efficiency within their utilities.

SPEAKERS

◦ **Short Elliot Hendrickson**
Andrew Dane & SEH Staff

◦ **WRWA**
Patrick Harrington

**The room will open at 7:30 am
with the class starting at 8:00 am.
Class will run until
approximately 3:00 pm.**

PRE-REGISTRATION REQUIRED

Please visit our Web Page at <http://wrwa.org/workshop.html> for location map and other training sessions held around the state.

Locations – Please check appropriate dates
